RESEARCH IN PROGRESS **SPRINT** **NO. 3343-35:**
 The purpose of this study was to determine if increasing the amount of physical activity that children are engaged in during the school day would result in a decrease in the amount of time that children would spend in sedentary activities. The study was conducted in a public elementary school in the city of Dallas, Texas. The study was conducted in the spring of 2004. The study was conducted in the spring of 2004. The study was conducted in the spring of 2004.
