

A black and white photograph of a large, multi-story building with a prominent central tower and many windows, likely a government or institutional building. The building is viewed from a low angle, emphasizing its height. The central tower has a distinct, slightly wider section near the top. The facade is covered in numerous rectangular windows, some of which are dark, suggesting they might be closed or the interior is dimly lit. The building is set against a light, possibly overcast sky. The overall style is that of a mid-20th-century architectural photograph.

A scatter plot showing the relationship between the number of children and the number of books. The x-axis is labeled 'Number of children' and ranges from 0 to 10. The y-axis is labeled 'Number of books' and ranges from 0 to 10. The data points are: (1, 1), (2, 2), (3, 3), (4, 4), (5, 5), (6, 6), (7, 7), (8, 8), (9, 9), (10, 10). A line of best fit is drawn through the points, starting at (0, 0) and ending at (10, 10).
