AT PAL, ADAJAN, SURAT

INTENTIONALLY LAVISH EXCLUSIVE 3.5 BHK APARTMENTS

Green City Success Story...

Green City came into existence as a part of an integrated township project introduced by Green Group in Surat. A Green City project started in the year 2008 as the biggest residential project in Surat. Under a Green City project, Green group has successfully completed the construction of more than 27 towers and granted possession to people in the first phase of this project. In Addition, Green group has already completed a number of prestigious projects successfully. The project was a huge hit and received a massive response with 100 % booking on the opening day of the second phase. The highlight of the project has been luxurious world class housing, amenities for middle income groups in a safe, secure, prudently administered and urbanely designed space. With an assurance of a healthy lifestyle, celestial landscape and an exotic view, Green City is a wonder in itself.
