Activity

- Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality (topography, land use, changes in water bodies, etc.)**

S.No	Information/Checklist confirmation	Yes/No	Details there of (with approximate quantities/rates, wherever possible) with source of information data
1.1	Permanent or temporary change in land use, land cover or topography including increase in intensity of land use (with respect to local land use plan)	Yes	The project will change the land use, land cover or topography with respect to local landuse. The project will be developed as a Residential Project.
1.2	Clearance of existing land, vegetation and buildings?	Yes	Vegetation may be required to be cut before construction work.
1.3	Creation of new land uses?	Yes	The project will be developed as a Residential Project in accordance with local development plan.
1.4	Pre-construction investigations e.g. bore houses, soil testing?	Yes	Soil testing report is attached vide Annexure 2
1.5	Construction works?	Yes	There will be construction of Residential flats (160 Flats), and one level basement for parking only.
1.6	Demolition works?	No	Not applicable.
1.7	Temporary sites used for construction works or housing of construction workers?	No	Not applicable.
1.8	Above ground buildings, structures or earthworks including linear structures,cut and fill or excavations and fill or excavations	Yes	There will be construction of maximum G/HP+10 floors and

			Society Office. Excavation for basement.
1.9	Underground works including mining or tunneling?	No	Not applicable.
1.10	Reclamation works?	No	Not applicable.
1.11	Dredging?	No	Not applicable.
1.12	Offshore structures?	No	Not applicable.
1.13	Production and manufacturing processes?	No	Not applicable.
1.14	Facilities for storage of goods or materials?	Yes	Construction Phase: Minimum material for construction will be bought as and when required from local market and will be temporarily stored at site with proper arrangement of storage and under proper cover.
1.15	Facilities for treatment or disposal of solid waste or liquid effluents?	Yes	Solid Wastes: Solid waste generated in proposed project will be mainly of domestic nature. The 0.5 tonne/day of solid wastes generated will be segregated into biodegradable and non-biodegradable wastes and collected in separate bins. The non-biodegradable wastes will be sold to recyclers or users and the biodegradable wastes will be collected and convert into compost. Liquid Effluent: On site proper sanitation facilities will be provided for construction workers. Proper disposal during the
1.16	Facilities for long term housing of operational workers?	No	Not applicable.
1.17	New road, rail or sea traffic during construction or operation?	No	Not applicable.
1.18	New road, rail, air water borne or other transport infrastructure including new or altered routes and stations, ports, airports etc?	No	Not applicable.
1.19	Closure or diversion of existing transport routes or infrastructure leading to changes in traffic movements?	No	Not applicable.
1.20	New or diverted transmission lines or pipelines?	No	Not applicable.
1.21	Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No	Not applicable.
1.22	Stream crossings?	No	Not applicable.
1.23	Abstraction or transfers of water from ground or surface waters?	Yes	- Construction Phase: During construction phase fresh water requirement 19.5 KLD will be met through the Tankers. - Operation Phase: During operational phase fresh water requirement of 85 KLD will be met through AMC.
1.24	Changes in water bodies or the land surface affecting drainage or run-off?	No	Not applicable.
1.25	Transport of personnel or materials for construction, operation or decommissioning?	Yes	Transport of personnel and materials will be required for both

			construction and operation phases.
1.26	Long-term dismantling or decommissioning or restoration works?	No	Not applicable.
1.27	Ongoing activity during decommissioning which could have an impact on the environment?	No	Not applicable.
1.28	Influx of people to an area in either temporarily or permanently?	Yes	During construction phase, 100 workers will be employed temporarily and hired from local area. During the operational phase, there will be influx of more than 1000 (800 permanent, 200 visitors) people.
1.29	Introduction of alien species?	No	Not applicable.
1.30	Loss of native species or genetic diversity?	No	Not applicable.
1.31	Any other actions?	No	Not applicable.

2 Use of Natural resources for construction or operation of the Project (such as land, water, materials or energy, especially any resources which are non-renewable or in short supply):

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
2.1	Land especially undeveloped or agricultural land (ha)	No	Not applicable
2.2	Water (expected source & competing users) unit: KLD	Yes	Water demand will be as follows: Construction phase Maximum Quantity:19.5 (KLD) Source: Tankers Operation phase Maximum Quantity: 85 (KLD) Source: AMC
2.3	Minerals (MT)	No	Not applicable
2.4	Construction material – stone, aggregates, sand / soil (expected source – MT)	Yes	Construction materials such as stone, cement, sand, bricks, marble, paints, tiles, electric ware, sanitary ware, glass will be used. All the above materials will be purchased from the local market and from nearest quarries, as and when required. It will be stored temporarily at the site.
2.5	Forests and timber (source – MT)	Yes	Minimum timber will be used for making different door and window frames
2.6	Energy including electricity and fuels (source, competing users) Unit: fuel (MT),energy (MW)	Yes	Source: Torrent Expected Demand : 900 KVA D.G. set: 62.5 KVA in case of power failure (dedicated for fire only) Fuel : HSD 15 l/hr
2.7	Any other natural resources (use appropriate standard units)	No	Not applicable

3 Use, storage, transport, handling or production of substances or materials, which could be harmful to human health or the environment or raise concerns about actual or perceived risks to human health

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
3.1	Use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies)	No	Not applicable
3.2	Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No	Suitable drainage and waste management measures will be adopted in both construction and operational phase
3.3	Affect the welfare of people e.g. by changing living conditions?	No	Not applicable
3.4	Vulnerable groups of people who could be affected by the project e.g. hospital patients, children, the elderly etc.	No	Not applicable
3.5	Any other causes	No	Not applicable

4 Production of solid wastes during construction or operation or decommissioning (MT/month)

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
4.1	Spoil, overburden or mine wastes	Yes	Excavated surplus earth will be refilled in the project premises. Top soil will be used for development of greenbelt. Balance earth will be disposed nearby other project.
4.2	Municipal waste (domestic and or commercial wastes)	Yes	The municipal solid wastes generated during operation phase will consist of: Organic waste: Waste vegetables and foods Inorganic waste: Papers, cartons, Thermocol, plastics, polythene bags, Glass, etc. Solid waste storage Adequate number of collection bins, separately for biodegradable and non-biodegradable waste will be provided as per Municipal Solid Waste Management Rules, 2016. Waste from such bins will be collected separately on daily basis. The quantity of solid wastes generated will b
4.3	Hazardous wastes (as per Hazardous Waste Management Rules)	Yes	Only used oil (category 5.1) will be generated from DG Sets used oil will be collected and handed over to recyclers
4.4	Other industrial process wastes	No	Not applicable.
4.5	Surplus product	No	Not applicable.

4.6	Sewage sludge or other sludge from effluent treatment	Yes	Sludge will be convert into compost
4.7	Construction or demolition wastes	Yes	The construction waste will consist of construction debris along with cement bags, steel in bits and pieces, insulating and packaging materials etc. Cement bags, waste paper and cardboard packing material will be sold off to recyclers. Steel scrap will also be collected at site and sold to recyclers.
4.8	Redundant machinery or equipment	No	Not applicable.
4.9	Contaminated soils or other materials	No	Not applicable.
4.10	Agricultural wastes	No	Not applicable.
4.11	Other solid wastes	No	Not applicable.

5 Release of pollutants or any hazardous, toxic or noxious substances to air(Kg/hr)

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
5.1	Emissions from combustion of fossil fuels from stationary or mobile sources	Yes	The operation of proposed project does not envisage any major air pollutant generating sources except vehicular movement.
5.2	Emissions from production processes	No	Not applicable
5.3	Emissions from materials handling including storage or transport	Yes	At the time of transportation, dust will be generated. This will be restricted to the construction phase and to the construction site only. 3m peripheral barrier will be provided.
5.4	Emissions from construction activities including plant and equipment	Yes	At the time of transportation & construction, dust will be generated. Water sprinkling will be carried out to minimize dust suppression.
5.5	Dust or odours from handling of materials including construction materials, sewage and waste	Yes	Construction Phase: Dust will be generated during construction activity. Water sprinkling will be carried out to minimize dust suppression. On site sanitation facilities (septic tank and soak pit) will be provided during the construction phase. Temporary Solid waste storage will be provided at site and recyclable material will be sold to recyclers. Operation Phase: It is estimated that about 98.4 KLD of wastewater will be generated during operation phase. Wastewater will be treated into 1

5.6	Emissions from incineration of waste	No	Not applicable
5.7	Emissions from burning of waste in open air (e.g. slash materials, construction debris)	No	Not applicable
5.8	Emissions from any other sources	No	Not applicable

6 Generation of Noise and Vibration, and Emissions of Light and Heat:

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
6.1	From operation of equipment e.g. engines, ventilation plant, crushers	Yes	Engine, mixer machine etc will be the main source of noise emission.
6.2	From industrial or similar processes	No	Not applicable.
6.3	From construction or demolition	Yes	Construction associated noise for a short time.
6.4	From blasting or piling	No	Not applicable.
6.5	From construction or operational traffic	Yes	Due to vehicle movement.
6.6	From lighting or cooling systems	Yes	Lighting system required
6.7	From any other sources	No	Not applicable.

7 Risks of contamination of land or water from releases of pollutants into the ground or into sewers, surface waters, groundwater, coastal waters or the sea:

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
7.1	From handling, storage, use or spillage of hazardous materials	No	Not applicable.
7.2	From discharge of sewage or other effluents to water or the land (expected mode and place of discharge)	No	It is estimated that about 98.4 KLD of wastewater will be generated during operation phase. Wastewater will be treated into 110 KLD capacity of STP. Treated wastewater will be used for flushing and gardening purpose. Balance treated wastewater will be disposed into municipal sewer line with prior permission.
7.3	By deposition of pollutants emitted to air into the land or into water	No	Not applicable.
7.4	From any other sources	No	Not applicable.
7.5	Is there a risk of long term build up of pollutants in the environment from these sources?	No	Not applicable.

8 Risk of accidents during construction or operation of the Project, which could affect human health or the environment

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
8.1	From explosions, spillages, fires etc from storage, handling, use or production of hazardous substances	No	Not applicable
8.2	From any other causes	Yes	During Construction phase there are possibilities of accidents, fall from height from scaffold and temporary stairs, cut or Burn injuries during cutting and welding activities, and electrocution during electrical fitting works. During operation phase possibility of accidents due to electrical fire hazard may occur.
8.3	Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	Yes	Project area is categorized in the seismic zone III. The structure Design is as per Codes to negate the threat of environmental and other damages.

9 Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality

S.No	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
9.1	Lead to development of supporting utilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: - Supporting infrastructure (roads, power supply, waste or waste water treatment, etc.) - housing development - extractive industries - supply industries - Other	Yes	The project site falls in AMC therefore any further development of basic infrastructure is required in vicinity of project. Negligible impact on supporting infrastructure
9.2	Lead to after-use of the site, which could have an impact on the environment	Yes	Negligible increase in traffic and there will be positive impact on socio- economic environment.
9.3	Set a precedent for later developments	Yes	The Project will lead to further development of a Residential Project
9.4	Have cumulative effects due to proximity to other existing or planned projects with similar effects	Yes	The Project will lead to further development of a Residential Project

(III) Environmental Sensitivity

S.No	Areas	Name/Identity	Aerial distance (within 15km.) Proposed project location boundary
1	Areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value	No	Not Applicable
2	Areas which are important or sensitive for ecological reasons - Wetlands, watercourses or other water bodies, coastal zone, biospheres, mountains, forests	Yes	Sabarmati River is ~1.2 km in SE direction
3	Areas used by protected, important or sensitive species of flora or fauna for breeding, nesting, foraging, resting, over wintering, migration	No	Not Applicable
4	Inland, coastal, marine or underground waters	No	Not Applicable
5	State, National boundaries	No	Not Applicable
6	Routes or facilities used by the public for access to recreation or other tourist, pilgrim areas	Yes	Sabarmati Railway Station is ~1.2 Km in NE Direction Ahmedabad Airport is ~4.7 Km in E Direction 132 ft Ring Road is ~0.22 Km in S Direction
7	Defence installations	No	Not Applicable
8	Densely populated or built-up area	Yes	Ahmedabad City
9	Areas occupied by sensitive man-made land uses (hospitals, schools, places of worship, community facilities)	Yes	Ahmedabad
10	Areas containing important, high quality or scarce resources. (ground water resources,surface resources,forestry,agriculture,fisheries,tourism,minerals)	No	Not Applicable
11	Areas already subjected to pollution or environmental damage.(those where existing legal environmental standards are exceeded)	No	Not Applicable
12	Areas susceptible to natural hazard which could cause the project to present environmental problems (earthquakes, subsidence, landslides, erosion, flooding or extreme or adverse climatic conditions) similar effects	Yes	Project area is categorized in the seismic zone III

Site Elevation in mtrs AMSL as submitted by Applicant*	53.425 M
Permissible Top Elevation in mtrs Above Mean Sea Level(AMSL)	125.6 M (Restricted)

*As provided by applicant

3. This NOC is subject to the terms and conditions as given below:

- a. Permissible Top elevation has been issued on the basis of Site coordinates and Site Elevation submitted by Applicant. AAI neither owns the responsibility nor authenticates the correctness of the site coordinates & site elevation provided by the applicant. If at any stage it is established that the actual data is different, this NOC will stand null and void and action will be taken as per law. The office in-charge of the concerned aerodrome may initiate action under the Aircraft (Demolition of Obstruction caused by Buildings and Trees etc.) Rules, 1994"
- b. The Site coordinates as provided by the applicant in the NOC application has been plotted on the street view map and satellite map as shown in ANNEXURE. Applicant/Owner to ensure that the plotted coordinates corresponds to his/her site. In case of any discrepancy, Designated Officer shall be requested for cancellation of the NOC.
- c. Airport operator or his designated representative may visit the site (with prior coordination with applicant or owner) to ensure that NOC terms & conditions are complied with.
- d. The Structure height (including any superstructure) shall be calculated by subtracting the Site elevation in AMSL from the Permissible Top Elevation in AMSL i.e. Maximum Structure Height = Permissible Top Elevation minus (-) Site Elevation.
- e. The issue of the 'NOC' is further subject to the provisions of Section 9-A of the Indian Aircraft Act, 1934 and any notifications issued there under from time to time including the Aircraft (Demolition of Obstruction caused by Buildings and Trees etc.) Rules, 1994.

f. No radio/TV Antenna, lighting arresters, staircase, Muntree, Overhead water tank and attachments of fixtures of any kind shall project above the Permissible Top Elevation of 125.6 M (Restricted) (AMSL), as indicated in para 2.

g. Use of oil, electric or any other fuel which does not create smoke hazard for flight operations is obligatory, within 8 KM of the Aerodrome Reference Point.

h. The certificate is valid for a period of 8 years from the date of its issue. One time revalidation without assessment may be allowed, provided construction work has commenced, subject to the condition that such request shall be made within the validity period of the NOC and the delay is due to circumstances which are beyond the control of the developer.

i. No light or a combination of lights which by reason of its intensity, configuration or colour may cause confusion with the aeronautical ground lights of the Airport shall be installed at the site at any time, during or after the construction of the building. No activity shall be allowed which may affect the safe operations of flights.

j. The applicant will not complain/claim compensation against aircraft noise, vibrations, damages etc. caused by aircraft operations at or in the vicinity of the airport.

k. Day markings & night lighting with secondary power supply shall be provided as per the guidelines specified in chapter 6 and appendix 6 of Civil Aviation Requirement Series B Part I Section 4, available on DGCA India website: www.dgca.nic.in

l. The applicant is responsible to obtain all other statutory clearances from the concerned authorities including the approval of building plans. This NOC for height clearances is to ensure the safe and regular aircraft operations and shall not be used as document for any other purpose/claim whatsoever, including ownership of land etc.

m. This NOC has been issued w.r.t. the Civil Airports. Applicant needs to seek separate NOC from Defence, if the site lies within their jurisdiction. Applicants also need to seek clearance from state Govt. as applicable, for sites which lie in the jurisdiction of unlicensed aerodrome as outlined in Rule 13 of GSR751 (E)

n. In case of any discrepancy/interpretation of NOC letter, English version shall be valid.

o. In case of any dispute w.r.t site elevation and/or AGL height, top elevation in AMSL shall prevail.

Sub: Fire safety & protection, opinion for a proposed high-rise building / Low-Rise Building - High Rise Building

Sir,

This is to intimate that , the plans submitted for, High Rise Building , have all the required line drawings and write-up are as per the requirement of fire prevention and protection.

All norms as per the NBC-2016 part-IV fire and life safety guidelines / Gujarat State Fire Prevention & life safety measures Act - Rules / GDCR (2021) & CBD by AUDA / special instructions given by fire officer in charge or Chief Fire Officer have to be followed as far as the construction and Fire Prevention and Protection system, are to be followed as below.

Staircase :

1.5 meters for 9 to 25 meters building heights.

2.00 meters for 25 meters to above building heights, clear in width.

The staircase and lift shafts shall not go to the basement but if they go they have to be protected by 2 hours fire resistant construction including the doors.

A motorable road with 45 ton load bearing capacity and minimum as mention in table; is required around the building without obstruction to a clear motorable passage for fire/rescue vehicles.

Any transformer to be installed shall be away from the building & leaving open Space required around the building and below building height wise open space required around the building.

Margin for different types of building;

1) 8 to 25 Meters building - 3 meters

Plot area more than 750 sq. mt. : 4 Meters

2) Up to 45 Meters building : 6 Meters

3) Up to 70 Meters building : 8 Meters

The gate (entry) to the premises shall be minimum 6 meters or more if required, in width, entry gate to be provided on both sides.

The Fire Protection system shall be as mentioned in the approved plans.

1. All basements parking and HPP shall be fully sprinklered.

2. All lower basements should have positive pressure ventilation.

3. Electric Cable Shaft should have fire resistant doors.

In this Filed we can write what system they required in building – So whatever here we write that can be mention in final opinion letters
