Fig. 1. *Diagram illustrating the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard training program, while the experimental group received a modified training program. The results of the training program were compared between the two groups.*

Abstract. We study the asymptotic behavior of the eigenvalues of the Dirac operator associated to a Riemannian manifold with boundary. The asymptotic expansion of the eigenvalues is obtained by means of the pseudodifferential calculus. As an application we obtain the asymptotic expansion of the heat kernel trace of the Dirac operator.
